Location:
97 S Center Street
Baldwin, Florida

Project Size:
3,500 SF

Completion Date:
June 1995

Construction Cost:
\$240,000

The First Baptist Church of Baldwin originally had 150 to 180 seats. In 1995, it was expanded to approximately 300 seats. A new Fellowship Lobby was added as well as an enhanced main entrance, steeple and handicap access. New brick was incorporated into the new design and the new color scheme will serve as a model for the renovation of the rest of the campus.

Worship Center Before

The “country church” character of the original 70 year old worship center was successfully retained during the expansion of this worship center.

A complete makeover was achieved in a timely fashion and within the modest budget. In addition to expanding the seating capacity to double the existing capacity, new lighting, pews, and sound system were added.
