

Building “B” Renovation for Fruit Cove Baptist Church

Client/Contact:

*Fruit Cove Baptist Church
Tim Maynard
Pastor
904-665-6338*

Location:

Fruit Cove, Florida

Project Size:

9,200 SF

Completion Date:

June 2004

Construction Cost:

\$541,000 (\$58/SF)

Project Architect:

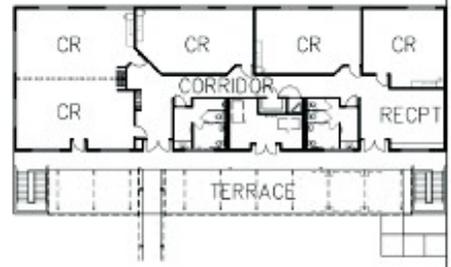

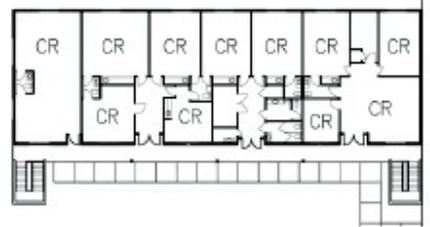

Stephen F. Lazar, AIA

Program/Challenges

A new multi-purpose building for this campus caused the existing building “B” to be vacated of the pre-school age children. Building “B” then became available for primary education classes. The challenge was to reconfigure the building plan to have an interior corridor rather than multiple doors to classrooms. The intent was to provide a more secure environment and controlled access.

Solution

A 6 foot wide interior corridor was created, utilizing existing exterior doors. The existing clear spanning structure allowed a new, flexible plan. The entire interior of the building was gutted and new electrical and HVAC systems were installed. All existing windows were replaced with new code-compliant operable windows. A large covered terrace was added to the west side of the building with an aluminum canopy designed to be compatible with the new church campus upgrades.
