Completion Date:

Construction Cost:
\$250,000.00 (est)

West Riverside Elementary School #12 was originally constructed in 1911 and will celebrate its 100th anniversary in 2011. According to school staff, West Riverside is the oldest, continuously operational elementary school in the State of Florida. VRL Architects designed a new handicap ramp adjacent to the Main School Entrance. A new elevator hoisting and elevator were also designed and constructed with no alteration to the historic structure. The project has been reviewed and approved by Riverside Avondale Preservation and the Jacksonville Historic Preservation Commission.
