3000 SF

**Completion Date:**  
Spring 2015

**Construction Cost:**  
Not Disclosed by Contractor

**Consulting Engineers:**  
**Structural** Atlantic Engineering  
Services  
**Plumbing Mechanical &  
Electrical** M.V. Cummings  
Engineers, Inc.

The developer of this new housing project wanted an iconic image at the Main Entrance Drive. VRL Architects worked with Wayne Kelly, P.E., M.V. Cummings Engineers and Atlantic Engineering Services to design and execute this Landscaped fountain/waterfall. The waterfall is structured with reinforced concrete masonry units with natural stone mortared into place so as to create resultant animated water splashing. Waterproof lighting provides a delightful evening aqua sculpture.
